1. **Depressurizing the Airgun**
   - Before you do anything else:
     - Make sure the air rifle is "ON SAFE" and pointed in a SAFE DIRECTION.
   - Pull off the protective cap that covers the fill nipple on the airgun.
   - Fig. 9
   - Make sure the air rifle is "ON SAFE" and pointed in a SAFE DIRECTION.
   - Make sure to wear eye protection.

2. **Loading and Unloading Pellets**
   - Load or unload pellets only in the following SAFE positions:
     - Keep the air rifle pointed in a SAFE DIRECTION.
     - Make sure the air rifle is "ON SAFE" and unloaded when removing it from storage.
   - Push the release buttons on both sides of the magazine and pull magazine down and out.
   - Put the airgun "ON SAFE." (See Section 3A) and point in a SAFE DIRECTION.
   - Push the jammed pellet into and out of the pellet magazine area of the rifle.
   - Press downward and forward on the barrel latch tabs (Fig. 11).
   - Insert a rod (not included) in to the barrel and push the jammed pellet into and out of the magazine.
   - The top of the front sight blade should be even with the top of the notch in the rear sight. The bulls-eye should appear to
     be centered on the front sight blade.

3. **Aiming and Firing Safely**
   - Always unload your gun before storing.
   - Always keep your finger off the trigger until you are ready to fire.
   - The use of a trigger lock or similar device is strongly recommended to prevent accidental discharges.

4. **Depressurizing the Airgun**
   - Before you do anything else:
     - Make sure the air rifle is "ON SAFE" and pointed in a SAFE DIRECTION.
   - Pull off the protective cap that covers the fill nipple on the airgun.
   - Fig. 9
   - Make sure the air rifle is "ON SAFE" and pointed in a SAFE DIRECTION.
   - Make sure to wear eye protection.

5. **Depressurizing the Airgun**
   - Before you do anything else:
     - Make sure the air rifle is "ON SAFE" and pointed in a SAFE DIRECTION.
   - Pull off the protective cap that covers the fill nipple on the airgun.
   - Fig. 9
   - Make sure the air rifle is "ON SAFE" and pointed in a SAFE DIRECTION.
   - Make sure to wear eye protection.

6. **Checking the Pellet**
   - Stage the pellet clip forward and feed the pellets into the slot of the magazine.
   - (Fig. 11)
   - Place the .177 caliber pellet .22 caliber pellets into the magazine.
   - Do not fire the air rifle at any time if the magazine is not secured into the barrel of the rifle.
   - Check the pellets to make sure they have not been loaded or reloaded.

7. **Checking the Pellet**
   - Stage the pellet clip forward and feed the pellets into the slot of the magazine.
   - (Fig. 11)
   - Place the .177 caliber pellet .22 caliber pellets into the magazine.
   - Do not fire the air rifle at any time if the magazine is not secured into the barrel of the rifle.
   - Check the pellets to make sure they have not been loaded or reloaded.

8. **Checking the Pellet**
   - Stage the pellet clip forward and feed the pellets into the slot of the magazine.
   - (Fig. 11)
   - Place the .177 caliber pellet .22 caliber pellets into the magazine.
   - Do not fire the air rifle at any time if the magazine is not secured into the barrel of the rifle.
   - Check the pellets to make sure they have not been loaded or reloaded.

9. **Checking the Pellet**
   - Stage the pellet clip forward and feed the pellets into the slot of the magazine.
   - (Fig. 11)
   - Place the .177 caliber pellet .22 caliber pellets into the magazine.
   - Do not fire the air rifle at any time if the magazine is not secured into the barrel of the rifle.
   - Check the pellets to make sure they have not been loaded or reloaded.

10. **Checking the Pellet**
    - Stage the pellet clip forward and feed the pellets into the slot of the magazine.
    - (Fig. 11)
    - Place the .177 caliber pellet .22 caliber pellets into the magazine.
    - Do not fire the air rifle at any time if the magazine is not secured into the barrel of the rifle.
    - Check the pellets to make sure they have not been loaded or reloaded.

11. **Checking the Pellet**
    - Stage the pellet clip forward and feed the pellets into the slot of the magazine.
    - (Fig. 11)
    - Place the .177 caliber pellet .22 caliber pellets into the magazine.
    - Do not fire the air rifle at any time if the magazine is not secured into the barrel of the rifle.
    - Check the pellets to make sure they have not been loaded or reloaded.

12. **Checking the Pellet**
    - Stage the pellet clip forward and feed the pellets into the slot of the magazine.
    - (Fig. 11)
    - Place the .177 caliber pellet .22 caliber pellets into the magazine.
    - Do not fire the air rifle at any time if the magazine is not secured into the barrel of the rifle.
    - Check the pellets to make sure they have not been loaded or reloaded.

13. **Checking the Pellet**
    - Stage the pellet clip forward and feed the pellets into the slot of the magazine.
    - (Fig. 11)
    - Place the .177 caliber pellet .22 caliber pellets into the magazine.
    - Do not fire the air rifle at any time if the magazine is not secured into the barrel of the rifle.
    - Check the pellets to make sure they have not been loaded or reloaded.

14. **Checking the Pellet**
    - Stage the pellet clip forward and feed the pellets into the slot of the magazine.
    - (Fig. 11)
    - Place the .177 caliber pellet .22 caliber pellets into the magazine.
    - Do not fire the air rifle at any time if the magazine is not secured into the barrel of the rifle.
    - Check the pellets to make sure they have not been loaded or reloaded.

15. **Checking the Pellet**
    - Stage the pellet clip forward and feed the pellets into the slot of the magazine.
    - (Fig. 11)
    - Place the .177 caliber pellet .22 caliber pellets into the magazine.
    - Do not fire the air rifle at any time if the magazine is not secured into the barrel of the rifle.
    - Check the pellets to make sure they have not been loaded or reloaded.
