GOVERNMENT USE AND OWNERSHIP OF AIR GUNS.

IN THE PURCHASE AND USE OF AIR GUN, THE PURCHASER AND USER SHOULD COMPLY WITH ALL LAWS.

YEARS OF AGE OR OLDER READ ALL INSTRUCTIONS BEFORE USE. THIS IS A HIGH POWER GUN RECOMMENDED FOR USE BY THOSE 16.

DEATH MAY BE DANGEROUS UP TO 20 YARDS (200 METERS).

CAUTION: NOT A TOY. ADULT SUPERVISION REQUIRED.

Operation Manual

Single Pump Pneumatic

Model 717

Power Line

Daisy First in Airguns
**Step 1.** Put "ON SAFE".

**Step 2.** Open Bolt.

**Step 3.** Pump.

**Step 4.** Load.

**Step 5.** Close Bolt.

When bolt back, load one pellet (solid end forward) into feed track (Drawing No. 2).

---

**Operation Steps**

Instructions before attempting to shoot the pistol:

1. Put "ON SAFE".
2. Open Bolt.
3. Pump.
4. Load.
5. Take off safe.
6. Aim.

---

**WARNING:** This gun can cause death. Read and follow the instructions carefully. Do not load a pellet and fire. If you are not ready to shoot, you must not load a pellet.
REAR SIGHT ADJUSTMENT

ELEVATION

To move point of impact up, raise sight by turning screw "A" clockwise.

To move point of impact down, lower sight by turning screw "A" (counterclockwise). To lower the point of impact, lower sight.

UNLOAD PELLETS:

Follow the steps carefully. This is a dangerous condition. If a pellet gets stuck, follow the steps carefully.

Open bolt at once. Then remove all operations except step 4 (do not load pellet). If a jammed, this is a dangerous condition.

CAUTION: If a pellet does not fire after completing the operating steps, the gun is possibly damaged and cause a permanent leak.

IMPORTANT: Do not leave gun inumped up condition for more than one hour or air

NOTE: Bolt must be completely dosed, an indicated in Steps 5.

Step 6. AIM

Each time you fire the gun, use the correct sight picture.

Front sight

Bulseye

Rear sight

Step 7. TAKE "OFF SAFE"

PUMP ADJUSTMENT

CAUTION: Adjusting the pump lever to a clearance dimension larger than 0.010 inches will overstress the gun and result in permanent damage to the gun. Maximum performance will be achieved by adjusting the clearance as specified in Step 2.

1. With the pump lever in the fully compressed position, place a screwdriver or other tool of similar dimensions between the slots and the pump plunger, and turn the pump until the gap is between 0.004 and 0.006 inches.

2. Increase the clearance by moving the pump plunger further into the receiver, and decrease it by moving the pump plunger further out of the receiver.

NOTE: If the screwdriver or tool used to adjust the pump is too large, it may cause damage to the gun. If the screwdriver or tool is too small, it may not provide the required clearance.

IMPORTANT: After several thousand shots, the length of the pump lever stroke may increase, which can affect the performance of the pump. Adjust the pump lever to maintain optimum performance.

DRAWING 6

NOTE: At 15, 30, and 60 degrees of elevation, the pump lever angle should be approximately 23°. At 15 degrees of elevation, the pump lever angle should be approximately 22°. The pump lever angle should be adjusted to ensure proper operation of the pump lever.

NOTE: At 15, 30, and 60 degrees of elevation, the pump lever angle should be approximately 23°. At 15 degrees of elevation, the pump lever angle should be approximately 22°. The pump lever angle should be adjusted to ensure proper operation of the pump lever.

NOTE: At 15, 30, and 60 degrees of elevation, the pump lever angle should be approximately 23°. At 15 degrees of elevation, the pump lever angle should be approximately 22°. The pump lever angle should be adjusted to ensure proper operation of the pump lever.

NOTE: At 15, 30, and 60 degrees of elevation, the pump lever angle should be approximately 23°. At 15 degrees of elevation, the pump lever angle should be approximately 22°. The pump lever angle should be adjusted to ensure proper operation of the pump lever.

NOTE: At 15, 30, and 60 degrees of elevation, the pump lever angle should be approximately 23°. At 15 degrees of elevation, the pump lever angle should be approximately 22°. The pump lever angle should be adjusted to ensure proper operation of the pump lever.

NOTE: At 15, 30, and 60 degrees of elevation, the pump lever angle should be approximately 23°. At 15 degrees of elevation, the pump lever angle should be approximately 22°. The pump lever angle should be adjusted to ensure proper operation of the pump lever.

NOTE: At 15, 30, and 60 degrees of elevation, the pump lever angle should be approximately 23°. At 15 degrees of elevation, the pump lever angle should be approximately 22°. The pump lever angle should be adjusted to ensure proper operation of the pump lever.

NOTE: At 15, 30, and 60 degrees of elevation, the pump lever angle should be approximately 23°. At 15 degrees of elevation, the pump lever angle should be approximately 22°. The pump lever angle should be adjusted to ensure proper operation of the pump lever.

NOTE: At 15, 30, and 60 degrees of elevation, the pump lever angle should be approximately 23°. At 15 degrees of elevation, the pump lever angle should be approximately 22°. The pump lever angle should be adjusted to ensure proper operation of the pump lever.

NOTE: At 15, 30, and 60 degrees of elevation, the pump lever angle should be approximately 23°. At 15 degrees of elevation, the pump lever angle should be approximately 22°. The pump lever angle should be adjusted to ensure proper operation of the pump lever.
**GUNS OUT OF WARRANTY**

If your Daisy needs repair, address it to the gun's name and description of the service department. Daisy will repair the gun of its own initiative with a reasonable amount of promptness and without transportation prepaid or any instruction to that effect. If you have your name and address on the gun, we will send you an estimate of the repair. For any other repair work your gun is subject to charge. See page 2 for full details.

**LIMITED ONE YEAR WARRANTY**

This warranty is extended to the buyer of the original owner, subject to the following conditions:

1. The gun must be returned to the factory for repair service during the warranty period. The buyer must pay all shipping charges.
2. The warranty is void if the gun has been altered or modified in any way.
3. The warranty does not cover any damage caused by misuse or abuse.
4. The warranty is void if the gun has been subjected to normal wear.

**REPAIR OF DAISSY GUNS**

Refused for repair: "No charge is not to be deducted if the gun is returned to the factory for repair service. The buyer must pay all shipping charges."

**CAUTION**

Modification of any firearm is prohibited by law. Any unlicensed person is prohibited from altering or removing any part of a firearm without professional training and certification. Such modifications may be dangerous and illegal. Before modifying your firearm, consult a professional. Any unauthorized modification is prohibited by law.

**MODIFICATIONS FOR X-LITE**

Guns are subject to change without notice. Do not exceed the maximum recommended pressure. Always use the correct lubricants and parts. Explosive gun parts, drawings, and price lists are available from Daisy Service Department.
