SAFETY:

1. AIMING AND FIRING SAFELY

• Always aim in a SAFE DIRECTION. When you are sure of your target and backstop, and the area around the target is clear, fire the weapon.

• Fire the weapon with both hands, using the non-dominant hand to fully depress the trigger. Do not fire the weapon with a single hand.

• Fire the weapon at a safe target. An unloaded gun which is "ON SAFE" is safest. Accidents happen fast, though it were loaded. do not point at anything you do not intend to shoot.

• Never reuse ammunition.

• Use the proper size BBs for your airgun.

• Use your backstop effectively.

• Never attempt to load or unload while the CO2 capsule is in the gun, unless otherwise instructed by the manufacturer.

• Always treat the air pistol as though it is loaded and with the same respect you would a firearm.

• Tampering with the air pistol or attempts to change the air pistol in any way may make it unsafe to use and will void the warranty.

• The air pistol is correctly aimed if you can see both the BB and your sight picture in the same focal plane.

• The air pistol is correctly fired if you see the BB and your sight picture become out of focus at the same time.

• Always unload the air pistol before cleaning or maintenance.

• Keep the air pistol away from children.

• Always keep the gun clean and dry.

• Never load BBs until you have verified the air pistol will discharge CO2 properly.

• Always know what you are shooting at.

• Always keep the air pistol pointed in a SAFE DIRECTION.

• Always keep the gun clean and dry.

• Always keep the air pistol pointed in a SAFE DIRECTION.

• Always keep the gun clean and dry.
