THANK YOU FOR PURCHASING A KWA PERFORMANCE INDUSTRIES, INC. PRODUCT. KWA Performance Industries, Inc. is committed to serving our customers with the finest quality products, the highest level of service, and the best customer satisfaction. Because of this, we offer a 90 day warranty on all KWA products we import and distribute.

Warranty Coverage
Except as specified below, this warranty covers all defects in material and workmanship in KWA products that occur during the above warranty period. The following are not covered by the warranty: (1) Any product which is not imported and distributed in the U.S.A. by KWA PERFORMANCE INDUSTRIES, INC. (2) Any products not purchased in the U.S.A. from a KWA AUTHORIZED RESELLER. If you are uncertain as to whether a reseller is a KWA AUTHORIZED RESELLER, please contact KWA PERFORMANCE INDUSTRIES, INC. as listed above or visit our website www.kwausa.com/where-to-buy (3) Damages, deterioration, or malfunction resulting from: a) An accident, act of nature, abuse, misuse, neglect, opening of or modification or failure to follow instructions supplied with the product. b) Repair or attempted repair by anyone not authorized by KWA PERFORMANCE INDUSTRIES, INC. c) Removal of the orange safety tip. (4) Use of the product outside the U.S.A. (5) Damaged batteries or improper use of bullets (BBs), or non approved propellants (ie. Propane, Red Gas, 134a...etc.) (6) Use in industrial, commercial, and/or professional applications.

What KWA Will Pay For
If your KWA product is found to be defective by KWA Performance Industries, Inc. during the applicable warranty period from the date of original purchase, KWA Performance Industries, Inc. will repair, or at its option, replace with new, used, or equivalent model, the defective product without charge for parts or labor.
How To Obtain Warranty Service
If your product needs service, it may be taken or shipped to KWA Performance Industries, Inc. The following procedures apply whenever your unit must be transported for warranty service:

• You must go to the Help Desk at www.kwausa.com/support to obtain an RMA number. THE RMA NUMBER MUST BE CLEARLY MARKED ON THE OUTSIDE OF THE PACKAGE. PACKAGES WITHOUT AN RMA NUMBER CLEARLY MARKED WILL BE REFUSED AND RETURNED TO THE SENDER.

• You are responsible for transporting your unit or arranging for its transportation.

• If shipment of your unit is required; you must pay the initial shipping fee, but we will pay the return shipping charge if the repairs are covered by the warranty.

• WHEN RETURNING YOUR UNIT FOR WARRANTY SERVICE, A COPY OF THE ORIGINAL SALES RECEIPT MUST BE ATTACHED.

• You must include the following: RMA number, your name, address, daytime telephone number, model and serial number (if applicable) of the product and a description of the problem.

This Warranty is Only Valid in the United States
If your product does not require service, but you have questions regarding its operation, please contact our Help Desk at www.kwausa.com/support.

THIS WARRANTY IS EXPRESSLY MADE IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING WITHOUT LIMITATION, WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

OUR LIABILITY IS LIMITED TO THE REPAIR OR REPLACEMENT, AT OUR OPTION, OF ANY DEFECTIVE PRODUCT AND SHALL IN NO EVENT INCLUDE INCIDENTAL OR CONSEQUENTIAL COMMERCIAL OR PROPERTY DAMAGES OF ANY KIND. WE ARE NOT RESPONSIBLE FOR PRODUCTS LOST, STOLEN AND/OR DAMAGED DURING SHIPPING.

SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS AND/OR DO NOT ALLOW THE EXCLUSION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, THE ABOVE LIMITATIONS AND EXCLUSIONS MAY NOT APPLY TO YOU.

This warranty gives you specific legal rights, but you may also have other rights which vary from state to state. This Warranty may not be altered other than in writing signed by an officer of KWA Performance Industries, Inc.
USE OF THIS MANUAL

Before operating the Airsoft gun, read this manual in its entirety. Important safety topics and tips are discussed throughout all of the chapters. It’s important that the operator know the principles of gun handling, safety, and operation prior to firing the Airsoft gun.

SAFETY GUIDELINES

Safety Distance
The effective shooting range is approximately 175 feet. BBs fired from this Airsoft gun may travel farther than intended. Make certain that you have an adequate backstop.

Eye Protection
Eye protection should be worn at all times when both shooting and maintaining your Airsoft gun. Protect your eyes from BBs under pressure while performing maintenance on your Airsoft gun.

Assume Every Gun is Always Loaded
Until you are certain the chamber is empty, treat every gun as if it were loaded. Do not assume the chamber is empty based on your memory or someone else’s words. Always remove the magazine and visually check to confirm the chamber is empty.

Beware of Barrel Obstructions
Ensure the Airsoft gun barrel is free of obstructions before you fire the gun. Even the smallest obstruction such as dirt, dust, or a stuck cleaning patch can cause a jam, misfire, or malfunction.

Muzzle Control
Always keep the muzzle of the gun pointed in a safe direction. Never point the muzzle at a person or object that you do not intend to shoot.

Keep Your Safety On
Keep the gun’s safety on until your sights are aligned on your target and you are ready to fire.

Keep Your Finger Off The Trigger
Keep your finger off the trigger and out of the trigger guard until your sights are aligned on your target and you are ready to fire.

Identify Your Target and Backstop
Before you pull the trigger, make certain of your target and what is beyond it. The Airsoft gun should never be fired at surfaces such as rocks, glass, water, or other hard surfaces where BBs are likely to ricochet in unpredictable directions.

⚠️ WARNING:
- Airsoft BBs can be a choking hazard. Keep them away from children.
- Failure to follow safety guidelines may result in serious injury.
SAFETY GUIDELINES (CONTINUED)

Failure To Fire
If the Airsoft gun fails to fire, misfires, or malfunctions, do not look into the gun barrel. BBs can become lodged into the chamber, and serious eye injury may occur.

Maintain Your Gun Properly
Performing proper maintenance, as outlined in this manual, ensures that your Airsoft gun will be safe to shoot and will perform to its designed specifications for many years. Alterations, modifications or adjustments may damage your Airsoft gun, make it unsafe to shoot, and will void all warranty claims.

Store Your Gun Safely
Always store the Airsoft gun in a safe place, and out of reach of children. Always transport the Airsoft gun in a carrying case. Never display the Airsoft gun in a public place. Keep the safety engaged, and remove the magazine before storing the Airsoft gun.

NOTE: IT IS YOUR RESPONSIBILITY TO TAKE EVERY REASONABLE PRECAUTION TO ENSURE THE SAFE STORAGE AND TRANSPORTATION OF YOUR AIRSOFT GUN.

Orange Tip
The orange tip on Airsoft guns help Law Enforcement distinguish the replica guns from their real firearm counterparts. Altering the coloration or markings required by state or Federal law so as to make the product look more like a firearm is dangerous and may be a crime. Operator assumes all risks and responsibility when doing so.

Hazards of Being Mistaken for a Real Firearm
Airsoft guns have been mistaken by Police and Law Enforcement as real firearms. A confrontation with law enforcement while carrying an Airsoft gun can result in serious injury or even death. It is strongly advised to operate the Airsoft gun at a safe and legal location. In the event that you are approached by Law Enforcement personnel, you must comply with their instructions immediately to avoid an incident.

Alcohol, Medications, and Drugs
Do not handle or operate your Airsoft gun while under the influence of alcohol, medication or drugs.

Your Responsibility
Your Airsoft gun is well-engineered and manufactured to the highest standards. It was carefully inspected before it was packaged and shipped from our factory. Its safe use depends on you alone. You are the ultimate safety device. Like many other devices, your Airsoft gun is safe unless handled in an irresponsible or uneducated manner.

⚠️ WARNING:
- Adult supervision is required for any person under the age of 18.
SPECIFICATIONS: KM4A1

- Overall Length [Retracted] = 774.7 mm (30.5”)
- Overall Length [Extended] = 857.3 mm (33.75”)
- Outer Barrel Length = 355.6 mm (14”)
- Inner Barrel Length = 395 mm (15.55”)
- Inner Barrel Diameter = 6.05 mm
- Weight (without magazine) = 2.95 kg (6.5 lbs)
- Barrel thread = -14 mm
- Caliber = 6 mm
- Magazine Capacity = 120 rounds
- Rate of Fire = 20+ RPS
- Velocity = 118~125 MPS (390~410 FPS)*
- Energy Output with 0.20g BB = 1.07 Joules
- Power Source: 9.6v NiMh, 7.4v or 11.1v 15c Li-Po

*Individual test results may vary depending on brand of BBs, ambient temperature, and chronograph used.

Special Features:
- Adjustable Front and Rear Sights
- 6 Position Collapsible LE Stock
- Fiber Reinforced Hand Guard
- Semi and Full Auto Select Fire
- KWA 2GX Gearbox
- KWA 2G High Performance Bucking
- Adjustable Hop-Up
- Full Metal Alloy Receivers
- Realistic Construction and Field Stripping

PACKAGE CONTENTS: KM4A1

1 KM4A1 Airsoft Gun
1 Cleaning Rod
1 120 Round Magazine
1 Owners Manual
1 Sight Adjustment Tool
1 Safety Cap
2 Disassembly Tools
SPECIFICATIONS: KM4 CQB

- Overall Length [Retracted] = 673.1 mm (26.5”)
- Overall Length [Extended] = 756.5 mm (29.75”)
- Outer Barrel Length = 267 mm (10.5”)
- Inner Barrel Length = 273 mm (10.75”)
- Inner Barrel Diameter = 6.05 mm
- Weight (without magazine) = 2.49 kg (5.5 lbs)
- Barrel thread = -14 mm
- Caliber = 6 mm
- Magazine Capacity = 120 rounds
- Rate of Fire = 20+ RPS
- Velocity = 100~107 MPS (330~350 FPS)*
- Energy Output with 0.20g BB = 1.07 Joules
- Power Source: 9.6v NiMh, 7.4v or 11.1v 15c Li-Po

*Individual test results may vary depending on brand of BBs, ambient temperature, and chronograph used.

Special Features:
- Adjustable Front and Rear Sights
- 6 Position Collapsible LE Stock
- Fiber Reinforced Hand Guard
- Semi and Full Auto Select Fire
- KWA 2GX Gearbox
- KWA 2G High Performance Bucking
- Adjustable Hop-Up
- Full Metal Alloy Receivers
- Realistic Construction and Field Stripping

PACKAGE CONTENTS: KM4 CQB

1 KM4 CQB Airsoft Gun
1 Cleaning Rod
1 120 Round Magazine
1 Owners Manual
1 Sight Adjustment Tool
1 Safety Cap
2 Disassembly Tools
**BATTERY INSTALLATION**

1. Set the fire selector to safe mode. Place the safety cap on the barrel end. Slide the retaining ring back and remove the lower part of the hand guard.
2. Place the battery into the lower half of the hand guard. Push the connector plugs together firmly until they click into place.
3. Replace the lower battery cover and slide the retaining ring back into place.

**FUSE**

To replace the fuse, open the hand guard by following the same procedure as the battery installation. Open the fuse assembly and replace the fuse with a 20A glass fuse.
LOADING BBS

1. Release the magazine from the Airsoft gun by pressing the magazine catch button.
2. Feed the BBs into the magazine through the magazine feed lip as shown.

**NOTE:** The use of a BB loader, such as the KWA High Performance BB Loader, can help make the loading process easier and faster. (See page 11)

Loading safety tips:
- Switch the selector to safe
- Be sure the safety cap is on
- Keep your finger off the trigger at all times

---

**WARNING:**

- Always use high quality 6mm BBs, weighing 0.2g or heavier. For best results use 0.25g KWA Perfect BBs. Never use recycled or low grade BBs to prevent damage to your gun.
- KWA K120 magazines hold 120 rounds of BBs. DO NOT load more than 120 rounds into the magazine. Overloading will cause jamming issues.
USING KWA HIGH PERFORMANCE BB LOADER (Purchase Separately)

1. Release the magazine from the Airsoft gun by pressing the magazine release button.

2. Slide open the trap door on top of the BB loader. Fill the BB loader with BBs. *Do Not Overfill.

3. Flip down the dust cover to reveal the loading nozzle.

4. Fit BB loader into the magazine feed lip.

5. Press on BB loader plunger to load BB into magazine.

WARNING: Always use high quality 6mm BBs, weight 0.2g or higher. For best result use 0.25g KWA Perfect BBs. Never use recycled or low grade BBs to prevent damage to your gun.
LOADING MAGAZINE

1. Place the loaded magazine into the magazine well.
2. Lightly pull on the magazine to ensure it is locked in properly.

![Magazine Diagram]

FIRE SELECTOR SWITCH

1. Safe
Safe mode is the setting to the left as indicated in the diagram. In this mode the gun will not fire. For safety reasons, you should keep the switch in Safe mode at all times when you are not ready to fire.

2. Semi-Auto
Semi-Auto mode is the middle setting. In this mode the gun will fire one shot for each time you squeeze the trigger.

3. Full Auto
Full Auto mode is the setting to the right. In this mode the gun will fire continuously as long as the trigger is engaged.

⚠️ WARNING:
- Do not squeeze the trigger when switching the fire selector.
FRONT AND REAR SIGHT ADJUSTMENT

FRONT SIGHT ADJUSTMENT
1. The front sight can be moved up and down to zero the sights.
2. Turn counter clockwise to raise the post.
3. Turn clockwise to lower the post.

![Front Sight Adjustment Diagram]

REAR SIGHT ADJUSTMENT
1. Flip the rear sight between general and precision aiming.
2. To adjust the horizontal point of impact, rotate the windage knob located on the rear of the sight.
3. To adjust the vertical point of impact, rotate the sight elevation knob located on the left and right side of the sight.

![Rear Sight Adjustment Diagram]

The sight assembly is marked in millimeters for precise adjustments.

WARNING:
- If turned too far, the front sight will come off.
DISASSEMBLY

1. Remove magazine.
2. Shoot in semi-automatic mode 2-3 times to clear the barrel and reset the piston. Note: Check and clear the chamber of BB’s.
3. Set the selector to SAFE.
4. Remove the rear pin only from the lower receiver with the provided Allen wrenches.
5. Use 1 wrench to hold the cap screw and one to turn the set pin.
6. After removal of the cap screw, use the allen wrench to push the pin out.
7. Pull the upper receiver up.
8. Slide out the inner barrel with Hop-Up assembly.

! WARNING:
- Always place the safety cap on the barrel tip when servicing your gun. Be sure the fire selector is set to “SAFE”.
- If the receiver does not open, repeat step 2 as necessary.

ASSEMBLY

1. Insert the inner barrel and Hop-Up assembly into the upper receiver.
2. Secure the Hop-Up assembly into the upper receiver. Push down the upper receiver to close.
3. Align the pin holes. Insert the pin and use the allen wrench to tighten the cap screw.

⚠️ WARNING:
CLEANING

The Airsoft gun inner barrel should be cleaned after each shooting session. Regular cleaning prevents the effects of BB residue buildup that can hinder performance.

1. Ensure that the safety is engaged.

2. Remove the magazine and clear the chamber of loaded BBs.

3. Disassemble the receiver (see Disassembly section pg. 14).

4. Steps to use cleaning rod:
   a. Cut a piece of clean cotton cloth to 1 inch by 0.5 inch size. Insert one end of the cloth into the hole in the cleaning rod (adjust the length of cloth for smooth entry into the barrel).
   b. Wind the cloth around the cleaning rod.
   c. Insert the cleaning rod into the inner barrel, and push the rod through.
   d. Remove the cleaning rod and check the cotton cloth for dirt. Repeat a-c when necessary.

WARNING:
- Unload and clear the Airsoft gun before cleaning.
- DO NOT use spray silicone oil as a cleaning solution for the inner barrel.
HOP-UP SYSTEM

The Hop-Up device is one of KWA’s standard features, giving Airsoft BBs greater stability, further travel, and increased accuracy. Airsoft BBs are lightweight and can be affected by wind when fired. With the Hop-Up system, the trajectory of the Airsoft BBs can be adjusted according to the shooting environment or surroundings.

HOP-UP ADJUSTMENT
1. Test fire the gun to determine the amount of hop needed.
2. Remove the magazine.
3. Pull the charging handle back to clear chamber and open the ejection port cover.
4. Turn the Hop-Up Dial to adjust hop.
5. Turn dial to the left for less hop, turn dial to the right for more hop.
6. Test fire and adjust as needed.

### OPERATING UNDER UNUSUAL CONDITIONS

Unusual conditions are defined as any condition requiring special maintenance. Perform maintenance outlined for the climate similar to your operational area.

**Extreme Cold:**
Operating an Airsoft gas gun in extremely cold temperatures is not recommended. Cold temperatures will cause the Hop-up Bucking to harden, reducing its effectiveness. Gas will not expand properly in cold temperatures, so both the cycling rate and power will be dramatically reduced.

**Extreme Heat:**
Operating an Airsoft gas gun in extremely hot temperatures is also not recommended. Leaving the gun in direct sunlight for long periods of time, or operating in extremely hot areas will cause the gas to over-expand, damaging the internal workings of the gun. The increase in internal pressure from the expanding gas can also damage the seals and cause leaks in the magazine.

**Dust or Sand:**
Dust or sand can get into a gas gun and cause malfunctions and/or excessive wear. Keep the gun covered whenever possible. Use lubricant sparingly, as lube naturally attracts dirt and other particles. After use in a dusty area, always field strip the gun (refer to Disassembly Section) and clean any areas you can reach with a soft, lint-free cloth.
