   b. Clean the breech by inserting the cleaning rod (not included) into the barrel and rotating the rod clockwise.
   c. Be sure the barrel is unloaded before cleaning the breech.
   d. Clean the breech by inserting the cleaning rod (not included) into the barrel and rotating the rod clockwise.
   e. Be sure the barrel is unloaded before cleaning the breech.
   f. Clean the breech by inserting the cleaning rod (not included) into the barrel and rotating the rod clockwise.
   g. Be sure the barrel is unloaded before cleaning the breech.
   h. Clean the breech by inserting the cleaning rod (not included) into the barrel and rotating the rod clockwise.
   i. Be sure the barrel is unloaded before cleaning the breech.
   j. Clean the breech by inserting the cleaning rod (not included) into the barrel and rotating the rod clockwise.
   k. Be sure the barrel is unloaded before cleaning the breech.
   l. Clean the breech by inserting the cleaning rod (not included) into the barrel and rotating the rod clockwise.
   m. Be sure the barrel is unloaded before cleaning the breech.
   n. Clean the breech by inserting the cleaning rod (not included) into the barrel and rotating the rod clockwise.
   o. Be sure the barrel is unloaded before cleaning the breech.
   p. Clean the breech by inserting the cleaning rod (not included) into the barrel and rotating the rod clockwise.
   q. Be sure the barrel is unloaded before cleaning the breech.
   r. Clean the breech by inserting the cleaning rod (not included) into the barrel and rotating the rod clockwise.
   s. Be sure the barrel is unloaded before cleaning the breech.
   t. Clean the breech by inserting the cleaning rod (not included) into the barrel and rotating the rod clockwise.
   u. Be sure the barrel is unloaded before cleaning the breech.
   v. Clean the breech by inserting the cleaning rod (not included) into the barrel and rotating the rod clockwise.
   w. Be sure the barrel is unloaded before cleaning the breech.
   x. Clean the breech by inserting the cleaning rod (not included) into the barrel and rotating the rod clockwise.
   y. Be sure the barrel is unloaded before cleaning the breech.
   z. Clean the breech by inserting the cleaning rod (not included) into the barrel and rotating the rod clockwise.

6. TRIGGER DEVICE
   a. The trigger device is a safety and a system that helps prevent accidental firing.
   b. To adjust the trigger pull, you will need a trigger pull gauge and a distance measuring device.
   c. To adjust the trigger pull, you will need a trigger pull gauge and a distance measuring device.
   d. To adjust the trigger pull, you will need a trigger pull gauge and a distance measuring device.
   e. To adjust the trigger pull, you will need a trigger pull gauge and a distance measuring device.
   f. To adjust the trigger pull, you will need a trigger pull gauge and a distance measuring device.
   g. To adjust the trigger pull, you will need a trigger pull gauge and a distance measuring device.
   h. To adjust the trigger pull, you will need a trigger pull gauge and a distance measuring device.
   i. To adjust the trigger pull, you will need a trigger pull gauge and a distance measuring device.
   j. To adjust the trigger pull, you will need a trigger pull gauge and a distance measuring device.
   k. To adjust the trigger pull, you will need a trigger pull gauge and a distance measuring device.
   l. To adjust the trigger pull, you will need a trigger pull gauge and a distance measuring device.
   m. To adjust the trigger pull, you will need a trigger pull gauge and a distance measuring device.
   n. To adjust the trigger pull, you will need a trigger pull gauge and a distance measuring device.
   o. To adjust the trigger pull, you will need a trigger pull gauge and a distance measuring device.
   p. To adjust the trigger pull, you will need a trigger pull gauge and a distance measuring device.
   q. To adjust the trigger pull, you will need a trigger pull gauge and a distance measuring device.
   r. To adjust the trigger pull, you will need a trigger pull gauge and a distance measuring device.
   s. To adjust the trigger pull, you will need a trigger pull gauge and a distance measuring device.
   t. To adjust the trigger pull, you will need a trigger pull gauge and a distance measuring device.
   u. To adjust the trigger pull, you will need a trigger pull gauge and a distance measuring device.
   v. To adjust the trigger pull, you will need a trigger pull gauge and a distance measuring device.
   w. To adjust the trigger pull, you will need a trigger pull gauge and a distance measuring device.
   x. To adjust the trigger pull, you will need a trigger pull gauge and a distance measuring device.
   y. To adjust the trigger pull, you will need a trigger pull gauge and a distance measuring device.
   z. To adjust the trigger pull, you will need a trigger pull gauge and a distance measuring device.

WARNING: IF YOU DO NOT FOLLOW THESE INSTRUCTIONS, YOU MAY BE HARMED OR KILLED. READ AND FOLLOW THE INSTRUCTIONS IN THIS MANUAL CAREFULLY BEFORE USING YOUR AIR RIFLE.
