Introduction

M16 (more formally Rifle, Caliber 5.56 mm, M16) is the U.S. military designation for a family of rifles derived from the ArmaLite AR-15 and further developed by Colt starting in the mid-20th century.

The M16 rifle family including the M16A1/A2/A3/A4 has been the primary infantry rifle of the United States military since the 1960s.

The M16A1 was simply the M16 with a forward assist feature requested by the Army. All early versions fired the M193/M196 cartridge in semi- or full-automatic modes.

The M16A2 is a select fire rifle capable of semi-automatic or three-round bursts and incorporating design elements desired by the Marine Corps. The M16A2 was essentially an M16A1 with an M16A1 fire control group; this had only limited procurement by the United States Navy.

The M16A4 became standard issue for the United States Marine Corps during Operation Iraqi Freedom, increasingly replacing the earlier M16A2. In the United States Army, a combination of the M16A4 and M4 Carbine have replaced the A2 as frontline rifles.

The M16 is primarily manufactured by Colt and Fabrique Nationale de Herstal, with variants produced by numerous countries around the world.
New Blow Back Pneumatic system

True to the faith of mimicking real life firearms, G&G is proud to present its new Pneumatic Blow Back system to its line of airsoft guns. Conventional airsoft blow back utilizes tow hook springs to mimic real life bolt actions, which often lead to excess wear, tear and poor reliability in the gear box. To alleviate the problem of conventional systems, G&G has independently developed the Pneumatic Blow Back system; a piston driven, gas operated mechanism to better mimic real life bolt actions.

This new technology utilizes compressed air to move the bolt, which enables the action without adding extra stress to the gear box.

This class leading system represents a significant milestone in the airsoft industry.

!!! Blow back version is available

Warning .GR16/G4 .GR16/G4. Warning

For more product information please visit our website www.guay2.com

You may be liable for damaging public, personal property, so for 5 playing a prank or as animal even if you only mean to shoot as a ‘practical joke.’ Make sure not to damage any property or animals when you try fun sport shooting.

Safety procedures:
1. Attach the safety cap to the muzzle.
2. Set the selector lever to the safety position.
3. Remove the magazine.
4. Remove the battery.

When shooting the air guns for target practice or in a game situation you and all participants must wear safety goggles or other eye protective gear. Also pay attention to third parties other than the participants.

Always attach the safety cap to the muzzle. Remove the battery and store the air gun in a case or bag and at a place that is out of reach by children.

Disassembling or modifying the gun may adversely affect the performance and make it dangerous. “It may be against the Law.”

Make sure to put the barrel and safety cap on the muzzle except when you are shooting. Do this to prevent accidental discharge of BB’s and also for dust protection purposes. Never pull the trigger while the barrel and the safety cap is attached.

Activating the trigger carelessly is extremely dangerous. Never put your finger on the trigger unless the safety cap is removed and you are ready to shoot a target.

Looking into the muzzle is extremely dangerous. Always make sure there are no BB’s loaded or if you get hit in the eye by a BB pellet you may in worst case lose your eye sight.

There may be cases when some BB’s remain in the gun after the magazine has been removed. After removal of the magazine always pull the trigger to confirm that there are no BB’s remaining in the gun then attach the safety cap.

Select a safe place for operating the air gun avoid places where people and cars are around.

When you carry the air gun with the safety cap on, set the selector lever to the safety position and always put the air gun in a case or bag.

Make sure to put the barrel and safety cap on the muzzle, except when you are shooting. Make sure not to damage any property or animals when you try fun sport shooting.

Select a safe place for operating the air gun avoid places where people and cars are around.

### Selector and safety setting

**Warning**
- Never operate the selector while pulling the trigger. Otherwise, malfunctions may occur.
- Pulling the trigger with the selector being set at safe mode may damage the air gun.

Always set the safety mode setting until immediately after firing

- Safety setting mode
  - The trigger can not be pulled

- Semi mode
  - Single shot
  - The gun will fire one shot each time when pulling the trigger.

- Fully automatic mode
  - Automatic firing
  - The gun will fire automatically while the trigger remains pulled.

### Installing battery

**Warning**
- Use only the G&G battery purchased from your local dealer.

**For fixed stock version**

- Lower the stock plate nail and open the cover.
- Connect the connector until you heard a click sound. Insert battery into the fixed stock.
- Close battery cover.

**For handguard version**

- Pull the slip ring and hold.
- Remove the lower handguard.
- Set the battery beside the outer barrel:
  - Connect battery plug with the connector until you heard a click sound.
  - Hold the battery and pull the slip ring. Remove the lower handguard.
Installing battery

**Warning**

- Use only the G&G battery purchased from your local dealer.

**Installing battery**

**For Extend battery stock version**

1. Push the stock release lever.
2. Pull the stock to last position.
3. Turn and take off the battery cover.

**For Extend battery stock version**

1. Insert battery into the stock.
2. Connect battery plug with the connector until you heard a click sound.

**For Extend battery stock version**

1. Pull and hold the stock release lever mount.
2. Pull out the stock.

**For Extend battery stock version**

- Use only the G&G battery purchased from your local dealer.

**For Extend battery stock version**

- Pull out the connector.
- Release the battery stock.
- Insert into upper receiver and connect firmly until you heard a click sound.

**For Extend battery stock version**

- Pull out the connector.
- Connect battery plug with the connector until you heard a click sound.
- Insert into upper receiver and connect firmly until you heard a click sound.

**For Patriot battery stock version**

- Use only the G&G battery purchased from your local dealer.

**For Patriot battery stock version**

- Pull out the connector.
- Connect battery plug with the connector until you heard a click sound.

**For Patriot battery stock version**

- Pull out the connector.
- Connect battery plug with the connector until you heard a click sound.
- Insert into upper receiver and connect firmly until you heard a click sound.
### Sight adjustment

**GR16/G4**

**Charging handle & Hop-up adjustment**

### Front sight adjustment

- **Precision targeting**
  - **Battle sight** (For common shooting)
    - Used for full automatic firing.
  - **Battle sight** (For special shooting)
    - Used for precision firing.

**Up-down adjustment**

- **Windage adjustment knob**
  - For left-right adjustment.
  - Turning clockwise: Shifts the pellet hitting point to the right.
  - Turning counterclockwise: Shifts the pellet hitting point to the left.

- **Turning the windage adjustment dial**
  - Will move the pellet hitting point to the left or right.

**For front sight up-down adjustment.**

- **Turning clockwise:** Raises the pellet hitting point.
- **Turning counterclockwise:** Lowers the pellet hitting point.

### Warning

- **Make sure not to lose the adjustment tool.**

### Hop-up adjustment

- **Normal**
- **Hop**

**Open the port cover**

1. The charging handle can be pulled and the bolt will be fastened.
2. Pulling the charging handle will take the bolt back and open the port cover.

**Turning hop-up dial for desired flight pattern of the BB pellet.**

- The hop-up dial can be turned to a certain degree.
- Turning it too much will damage the unit.

**This function only for Plastic / blow back version**

### Warning

- **Be careful not to catch your fingers in the dummy bolt.**

**Never hold the gun sideways as the BB pellets will curve right or left.**

- **This is due to the HOP-UP system.**

**Best position.**

- **Too much hop-up** (Return the lever toward Normal).
- **Not enough hop-up** (Move the lever toward HOP) or too much hop-up (Return the lever toward Normal).
Warning
► Only adjust if the gear noise becomes shrilly.

Depress the trigger guard
Depress the trigger guard plunger with a proper tool and open the trigger guard.

Motor adjustment
The motor adjustable screw is at the bottom of the grip. Use a screwdriver to adjust.

Forward grip setting
Set the forward grip on the rail. Move the forward grip to adjust position. Fasten the knob.

Install carrying handle
Connect the detachable carrying handle with the upper receiver. Fasten the interface knob. Finish.

Install rear sight
Put on the detachable rear sight on the upper receiver. Fasten the interface knob. Finish.
Set the forward grip on the rail. Rail handguard panels setting. Finish.

Put on Q.D. sling swivel mount on the rail. Fasten the screw.
Install the Q.D. sling swivel on the Q.D. sling swivel mount.
Install the Q.D. sling swivel on the sopmod tactical stock.

Pull the slip ring. Remove the lower handguard. Remove the upper handguard.

Push the release lever to unlock. Pull the stock. Adjust the position of stock (6 position).

Remove the handguard.
Remove the lower handguard.
Remove the upper handguard.
Setting the magazine

**Warning**
- Make sure to set the magazine upwards. It is securely installed when you heard a click sound.
- Confirm that the safety lever is set to Safety position and do not place your finger on the trigger.

**Setting the magazine**

1. Open the cover of magazine.
2. Load G&G 5.95mm BB pellets into the magazine. The magazine is capable of holding approximately 450 pellets.
3. After the BB pellets had been loaded, close cover and turn the gear on the bottom until the sound changes.
4. Insert the magazine into the body until you hear a click sound.
5. Press the magazine release.
6. Pull the magazine out of receiver.

**Firing**

**Warning**
- Select a safe place for operating the air gun.
- Never put your finger on the bolt when operating the air gun.

1. Make sure to install the magazine upwards. It is installed properly when you heard a click sound.
2. Set the Selector Lever to Semi or Full Auto.
3. Remove the protective cap only when you are ready for firing the gun.
4. Set the Selector Lever to Semi or Full Auto.
5. Make sure the barrel is empty.
6. Always disconnect the battery and attach the protective cap whenever you do not operate the air gun.

**Cautions on motor and battery**

1. Charge the battery if the firing cycle becomes slow.
2. Pausing using the air gun for about 5 to 10 minutes after firing about 500 rounds, in order to ensure long service lives of the motor and battery.
Maintenance when pellets speed becomes low

1. Drop a few drops of silicone oil or teflon oil into the pellet entrance. After inserting BB pellets into the magazine, fire the gun for up to 200~300 pellets.

2. To complete the cleaning, use the cleaning rod (with cotton) to remove excess oil.

Warning
- Do not jam the cleaning rod into the barrel by force.
- Should the BB's remains inside the barrel after following the instruction above, with the protection cap over the barrel point the gun to a safe direction, and discharge any loosened BB's in semi-automatic mode.

Removing clogged pellets

1. Return the hop-up dial to the Normal position and insert the cleaning rod from the lead edge of the barrel.

2. To remove clogged BB's, carefully insert the cleaning rod inside the flat tip facing down as shown below.

1.  Drop a few drops of silicone oil or teflon oil into the pellet entrance. After inserting BB pellets into the magazine, fire the gun for up to 200~300 pellets.
