NOTE: WEAR GOGGLE AT ALL TIMES!

There is a serious risk of personal injury, death, or property damage arising out of the use or misuse of this product. By using this product, you agree to freely accept and full assume all such risks.

Smoothly turn Parts #6 (Rotating adapter) Clockwise to install the XG-02 adapter. Do NOT cross the adapter threads! If there is any leaking after you install the XG-02, please take XG-02 out of propane immediately. Leaking only happens when you didn’t install correctly. (* How to tell it is leaking? You can hear the leaking sound and you can smell the propane odd odor.) (** When you take off XG02 from Propane tank, remember to hold tight of both XG02 and tank.)

Take off Parts #8 (Silicon oil adapter) and drop some silicon oil in order to lubricate your GBB Airsoft. Then, put part #8 back to XG02. (Propane gas is dry and doesn’t come with oil.) NOTE: * If there is propane leaking when you take off #8 silicon oil adapter, please uninstall XG02 immediately. You either don’t install XG02 correctly or your XG-02 is not working functionally. ** When you put part#8 back to XG02, please remember the oring (parts #10) is still there.

Apply some silicon oil onto Parts #3 (internal stem) in order to make the installation easily. There is an o-ring inside the head of propane tank. Make sure the o-ring is not defective. If the o-ring is crushed, the internal stem will have great friction during the installation. During the installation, If you can NOT turn the XG02 all the way down to the end, please make sure the Part#3 (internal stem) is tightly fixed onto the XG02. If not, please use “No. 12 hexagon end cap wrench” to make it tight.

If there is a leaking, please check the o-ring on propane tank and the Part#3.

PRE-CAUTION
1. Do NOT use this adapter near open flame or other sources of ignition.
2. Do NOT use this adapter indoor, To avoid leakage causing explosion.
3. This CHARGER is ONLY for Airsoft. Unauthorized modified will cause damage.
4. Remove adapter before storing or to prevent accidental release of propane.
5. Only use adapter with “disposable propane cylinders” which have passed the gauge test.
6. Do NOT use MAPP, Ethylene, CO2 or other gas. Only Propane. (Only disposable propane cylinders.)
7. Do NOT use an incomplete or damaged adapter.
8. Assure that adapter is correctly installed without leaking before use.

IMPORTANT!!
Always apply vertical force or the fill stem will be broken

(Important!! Apply vertical force onto tank only or the fill stem will be broken.)
Once this is done, the adaptor should come off the rest of the way with no trouble at all.
There is also a vent hole on the XG adapter which provides the same function.

Details:
9. Do **NOT** use adapter in poorly ventilated or confined spaces.
10. Refer to the following **Product Advisory and WARNING** on the other page.
