Both dot sights use a CR2032 battery (not included).

### Mounts

- **3/8" to 11mm mount**
- **Weaver mount**

Your Tech Force dot sight includes 2 mounts. One fits 3/8" to 11mm rails and dovetails, the other fits Weaver rails.
Adjustments

Unscrew small black caps on top & side

Elevation adjustment  Windage adjustment

Once the protective black caps have been removed, you can adjust the elevation and windage. Insert either a coin or small flat-bladed screwdriver into the slot on top of the knob and turn. You will hear and feel noticeable clicks to make it easier to adjust and readjust your dot sight.

Rheostat

The rheostat is the large adjustment knob on top. Use it to adjust the brightness of the dot. The brighter the dot, more you’ll see scattering of the dot’s light. Therefore, we recommend using the lightest dot you can to increase your accuracy.
Battery

To insert a battery, unscrew the top of the large knob using a coin or a flat-bladed screwdriver. Insert battery, reattach the knob cover.

Warranty

Your Tech Force dot sight is manufactured to the highest possible standards, using the finest materials to give a lifetime of service. In the unlikely event there are any defects in materials or workmanship in the first twelve (12) months after retail purchase, we will repair or replace the dot sight under warranty.

Note—The warranty will be invalid if:
- The sight has been disassembled and/or incorrectly reassembled.
- The sight has been altered in any way not recommended in the manual.
- The sight has been misused or abused.
- The original purchase receipt cannot be presented.

Note—The warranty does NOT cover:
- Any damage or faults caused by owner misuse or action.
- Shipment damage of the sight when being returned for warranty work.
- Battery replacement.

This warranty is in addition to your statutory rights. Retain your sales receipt as proof of purchase.
