**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

1. Remove one ThermaCELL® Mosquito Repellent mat from wrapper. One mat lasts a maximum of 4 hours. Mat turns from pale blue to white when active ingredient has been exhausted.

2. Make sure the ‘ON/OFF’ switch on the appliance is in the ‘OFF’ position. Insert the mat under the appliance’s black grill. To change mats, turn the ‘ON/OFF’ switch to ‘OFF’ and allow the appliance to cool completely. Push the used mat out by inserting a fresh one.

3. Remove the appliance cover and butane cartridge cap.

4. Screw the cartridge into the opening of the appliance. Make sure the cartridge is fully inserted by turning it clockwise until it stops. Replace the appliance cover. One ThermaCELL® butane cartridge lasts a maximum of 12 hours. If your appliance fails to heat, it may be out of fuel. Check the fuel level by holding the appliance vertically and looking at the fuel gauge on the bottom. You can see the amount of butane in the cartridge. Replace if empty.

5. Turn the ‘ON/OFF’ switch to the ‘ON’ position; the butane gas will begin to flow.

6. Wait approximately 5 to 10 seconds then depress the ‘START’ button three to five times in rapid succession.

7. To verify the appliance is operating, pick it up and check the lens on the end of the appliance. The light at the end of the appliance glows when the appliance is heating. If the light is not glowing, check to make sure the appliance is ‘ON’ and cartridge is completely screwed into place; then once again depress the ‘START’ button three to five times in rapid succession. Check to make sure the light is glowing.

8. Do not touch the grill; it will be hot after a couple of minutes. Some visible vapor will appear during use; this is normal. When finished using the appliance, turn the ‘ON/OFF’ switch to the ‘OFF’ position, and allow the appliance to cool completely. Appliance is now ready for storage.
